Passion Project: Yatted

Yatted is a mobile application that makes it easier to connect with your favorite tattoo artist from across the globe! Sometimes it can be difficult to find high quality artists especially if you're in an unfamiliar area. Yatted will enhance your tattoo experience by making it easier to locate and access your favorite artist.

Users will first insert the location from which they are looking to find artists from. Also , users will be able to edit filters which will then narrow down the user's list so they can more easily find their artist. Once users decide which artist is their favorite, they will be able to click their icon which will allow them to access their website, email, phone number and portfolio.

Getting a tattoo is already painful enough, So lets make find your artist as painless as possible ! Yatted is completely free, so register now !

Yatted will be developed using Java, SpringBoot, and also SQL DateBase.
